Abstract

PURPOSE: To provide the gift certificate issuing machine which can easily compare and judge a cash dealing price and a gift certificate price, solve problems regarding the printing and storage of plural kinds of gift certificate and the securing of a personal effect storage space, and gather and manage information on article appliers.

CONSTITUTION: A bar code reader 2 reads out the price code appended to an article used video cassette, etc.) and displays the cash dealing price corresponding to the read price code and a gift certificate price which is set in a specific price higher than the cash dealing price on a display unit 3. When a gift certificate selection setting key 121 for setting the selection of a gift certificate is pressed, a gift certificate having the gift certificate price printed by a printer 4 is outputted. Further, when the device is equipped with a data input means for inputting information regarding the applier of an article and a statistical processing means which statistically process respective input data, their information can be utilized.
